

Fully-equipped log bathhouse in one day

We are a Lithuanian company with long-term experience in producing log houses and perfectly combining old traditions of craftsmen and new technologies. We use the best materials for the production, therefore, we guarantee high quality and reasonable price. You will definitely feel good in a log bathhouse produced by us.

A log bathhouse will be produced, assembled and equipped in our factory according to the project chosen by you. A fully-equipped log bathhouse is transported to the location, it has its roof attached, communications connected and you can start using it right away. The construction of a bathhouse in your parcel of land takes 1 day.

The structure of a log house:

- Walls made of 12-16 cm logs, dried up to 18-20%;
- Roofing made of laths of Canadian white cedar;
- Wooden windows and doors;
- Floor and ceiling insulation;
- Chimney (if needed).

A house can be built on your foundation or on foundation brought by us.

The house has all indoor finish works done:

- Wood plank flooring;
- Ceiling of wood panels;
- Wooden door;
- Electricity installation;
- Indoor and outdoor illumination;
- Plumbing and sewage system;
- Ventilation system.

We recommend you equipping a separate insulated bath in a log house as it will help you not only to heat your bath rapidly and reach high temperature, but also protect your house from dampness, mould and make it long-lived. A separate insulated frame protects softwood logs from warmth and resins.

We produce log houses with fully-equipped baths:

- Separate wooden frame of a bath;
- 5 cm layer of thermal insulation;
- Damp insulation;
- Firewood or electric heater;
- Panels of the highest quality (linden or Canadian red cedar);
- Bunks made of African abachi timber;
- Overlaid in oil;
- Glass door of a bath;
- Shower cabin;
- Flooring of ceramic tiles;
- Ventilation system and sewerage system.

Other fittings: lightning, grates, enclosure for a heater, thermometer, stones for a bath, etc.

You can choose a typical project of a log bathhouse or make an individual one, select the layout of a house or bath, materials, colours, etc. to your taste.

We will produce a log bathhouse following your individual requirements. All materials and fittings meet the EU standards. The production period is 6-8 weeks.
